

# Sundaram Multi Asset Fund

April 2026

# Sundaram Multi Asset Fund Overview

- Sundaram Multi Asset Fund (SMAF) is a diversified Fund of Funds with exposure to equity and non-equity correlated asset classes with the objective of delivering steady, positive returns over the medium and long term.
  - ❖ Targeted payout of approximately 5% per annum via quarterly dividends.
- The Fund targets to allocate up to 60% in equities and up to 60% into non-equities.
  - ❖ Till 1st October 2025, the Fund could invest only in 2 asset classes - Global Equities and Life Settlements.
  - ❖ From 1st October 2025, investment Universe of the Fund has been expanded to include other asset classes such as Bonds, Gold and Cryptocurrencies.
- Since its inception in December 2020, the Fund has returned 5.2%\* on an annualized basis.

\* Allocations may exceed the mentioned limits from time to time. Please read the Information Memorandum for further details.

Fund inception date: 30 December 2020. Past performance may or may not be sustained in the future.

Performance for the Classic Class in USD inclusive of dividends paid out with the month end NAV generated specifically for performance purposes.

Performance as of March 31, 2026

# Performance of SMAF

Actual Fund performance (annualized) since inception

Fund inception date: 30 December 2020. Past performance may or may not be sustained in the future.

Data Source: Bloomberg; Analysis: In house as of March 31, 2026.

Performance for the Classic Class in USD inclusive of dividends paid out with the month end NAV generated specifically for performance purposes.

\*Theoretical Benchmark is a composite comprising of 50% MSCI All World Country Index and 50% Bloomberg Global Aggregate Bond Index (USD Hedged)

# Global Equities

- Global equities play a pivotal role in generating strong absolute returns over the long-term as they are direct beneficiaries of economic growth and developments happening globally.

## Performance of MSCI ACWI over multiple timeframes

In USD Terms*	5 Years	10 Years	15 Years	20 Years
MSCI ACWI	9.5%	11.3%	9.3%	7.6%

- The fund intends to invest in global equity fund(s) or ETF(s) exposed to strong, quality companies around the world.

# Bonds

- Since the start of 2022, central banks globally raised interest rates to tackle inflationary pressures.
  - ❖ The US Federal Reserve (Fed) and European Central Bank (ECB) have undertaken 450 and 525 bps of cumulative hikes, respectively, which had raised borrowing costs by a significant margin.
- At the current juncture, US tariff measures and slowing economic growth worldwide are prompting them to reduce rates.
  - ❖ Since the second half of 2024, both the central banks have respectively reduced rates by 175 and 235 bps.
- As quantitative easing progresses, bonds are expected to benefit from price appreciation and high prevailing yields present opportunities for regular dividend payouts.
- The fund intends to invest in global bond fund(s) or ETF(s) managed by major asset managers with a proven track record.
  - ❖ Focus on managers with consistent performance track across market cycles, with a preference for funds with regular dividends, diversified exposure and strong risk management.

# Life Settlements

- A Life Settlement is the sale of an existing U.S. life insurance policy to a third-party buyer. In exchange for payment, the buyer becomes the owner and beneficiary of the policy.
- The purchaser is responsible for future premium obligations and ultimately collects the face value when the policy matures.
- The U.S. life insurance market has an estimated \$20 trillion of life coverage currently in force. An estimated 88% of all life insurance policies are lapsed or surrendered back to the insurance carriers.
- Market continues to grow and attracts large institutional buyers as Baby Boomer population retires.

# Gold

- Freezing of Russian assets coupled with geopolitical uncertainties posed by the current US administration has led many countries to search for an alternative to the US Dollar.
- Gold is a natural beneficiary of this shift. Additionally, the US Fed's possible rate cuts and tariff shocks will further add to Gold's investment attractiveness.
  - ❖ Gold's share of global reserves outside the US Dollar has reached 26%, making it the world's second-largest reserve asset
- The fund's exposure will be via fund(s) or ETF(s) that track the price of the physical gold bullion.

# Cryptocurrencies

- The growing politicisation of the US Dollar is leading investors to focus on investment options outside of the US Dollar. Like Gold, Cryptocurrencies like Bitcoin and Ethereum are also beneficiaries of this move.
  - ❖ The current US administration has taken made steps to legitimise cryptocurrencies, including the establishment of a US Crypto Strategic Reserve.
  - ❖ As of June 2025, a total of 130 listed corporates held 3.2% of Bitcoin's supply, which is an increase of 170% yoy.
- The fund's exposure to this asset class will be through ETFs, notably Bitcoin-focused as it has a large base of investors and is decentralised with a robust mining infrastructure.
- Maximum exposure to this asset class will be limited at 5%, given that the global regulatory landscape is still evolving and price volatility remains high.

Channel Islands	Open Ended Investment Company	6	US\$ 491 mn
Isle of Man	Open Ended Investment Company	1	US\$ 31 mn
Luxembourg	Fond Commun de Placemont / SICAV	3	US\$ 167 mn
Lichtenstein	Open Ended Investment Company	2	US\$ 406 mn
Cayman Islands	Open Ended Investment Company	3	US\$ 203 mn
Delaware	Limited Partnership	1	US\$50 mn

# Key Risks

- Liquidity Risk - BlackOak is not a liquid fund. Typically, it takes 4 months for the redemption proceeds to be paid out.
  - Redemption pay out can in exceptional cases take 7 calendar months or more.
  - Mitigating factors:
    - There is a risk that payment of redemption proceeds may be delayed or subject to a longer repayment period. The Fund may experience delays in receiving redemption proceeds from the Underlying Entity, and in particular, redemption payments from the underlying life settlement funds may take up to seven calendar months or longer as specified in the relevant offer documents. As life settlement funds may constitute 60% or more of the Fund's Deposited Property, such delays could result in an extended timeframe for the Fund to make redemption payments to Holders. Where the Fund is unable to liquidate its investments in the Underlying Entities in a timely manner, or where redemption payments are delayed beyond the Realisation Payment Period, the Manager may, at its discretion, extend the Realisation Payment Period by up to seven calendar months in order to facilitate payment of redemption proceeds and protect the interests of Holders.
    - Gating of redemption requests: Manager may limit the redemption requests to 10% of the Units of the Fund or Class and in such event the limitation will apply pro rata.
    - Sundaram Multi Asset Fund's dealing is on a weekly basis.
- BlackOak Valuation - Based on internal valuation methodology.
  - Historic track record of the fund in this regard has been good thus far. Actual to expected mortality in terms of value is 119% as of December 31, 2023. (to update)
  - KPMG has examined the performance track record of BlackOak from 1 February 2014 to 31 December 2024. In their opinion, the performance track record reflects the performance of the Fund over the performance track record period.
- Market Risk - Investments by SMAF are subject to market fluctuations and may be adversely affected by political instability, exchange controls and other restrictions imposed by authorities in relevant countries.

Sundaram Asset Management neither guarantees its accuracy and/or completeness nor does it guarantee to update the information from time to time. This communication is for private circulation only and for the exclusive and confidential use of the intended recipient(s). Any other distribution, use or reproduction of this communication in its entirety or any part thereof is unauthorized and strictly prohibited. By accepting this document, you agree to be bound by the foregoing limitations. This communication is for general information only without regard to specific objectives, financial situations and needs of any particular person who may receive it and Sundaram Asset Management is not soliciting any action based on this document. In the discharge of its functions, Sundaram Asset Management may use any of the data presented in this document for its decision-making purpose and is not bound to disclose the same. For details about fund management services and performance, please refer to the Disclosure Documents available at the offices of the AMC.

**Securities investments are subject to market risks and there is no assurance or guarantee that the objectives of portfolios will be achieved.** As with any securities investment, the value of a portfolio can go up or down depending on the factors and forces affecting the capital markets. Past performance of the Fund Manager or AMC may not be indicative of the performance in the future. Sundaram Asset Management is not responsible or liable for losses resulting from the operations of any portfolio. The value of any portfolio illustrated in this document may be affected by changes in the general market conditions, factors and forces affecting capital markets in particular, level of interest rates, various market related factors and trading volumes, settlement periods and transfer procedures. The liquidity of investments are inherently restricted by trading volumes in the securities in which it invests. Investors in portfolios are not offered any guaranteed returns.
